

Capabilities Statement

Founded in 2012, NorrisLeal has delivered innovative solutions in system design, studies, construction management, construction, and resource management to government, state, municipal, and private clients. Our experience and expertise in water, wastewater, groundwater desalination, infrastructure, and construction has allowed NorrisLeal to excel in the design and implementation of water and non water projects in the State of Texas. This experience and the dynamic range of capabilities that our team demonstrates in all that we do will allow us to provide your solution meeting or exceeding your project goals.

“The quality of workmanship and support was impressive and of high quality. We had no instances where repairs / construction had been incomplete or inadequate (and, thus, result in the need for additional downtime and repairs).

Rather, they planned and executed work in a highly professional manner to minimize downtime, hit schedule commitments, and control costs. ”
